

REMARKS

Reconsideration of this application, as amended, is respectfully requested. The Specification has been amended as discussed with the Examiner during a teleconference. Specifically, a chart showing the use of reference numbers in the drawings as indicated in paragraph [0029] has been provided. No new matter is included by this amendment inasmuch as this numbering scheme was described in paragraph [0029] prior to this amendment. Further support exists in paragraphs 35, 36, 38 and 51 of the specification.

The objections to the specification under 37 CFR 1.71 are moot in light of the above-described amendments.

The objections to the drawings should be reconsidered. The claimed features are all shown in the drawings, as should be clear from the above-described amendments to the specification.

Paragraph [0051] has been amended to delete reference number 403 and to correct the reference to pressure controllers 409/411.

A typographical error in paragraph [0064] has been corrected with respect to reference number 642.

The above-described amendments to the specification also make the rejections of the claims under 35 USC 112 moot.

If there are any additional fees associated with this communication, please charge Deposit Account No. 19-3140.

Respectfully submitted,

SONNENSCHN NATH & ROSENTHAL LLP
